

JTECH Suspension

ALL NEW AND PURPOSE DESIGNED

Purpose designed to complement the Jayco Endurance Chassis, JTECH Suspension replaces beam axles with individual stub axles, allowing each wheel to react independently to the road surface, while also lessening the chassis' unsprung weight. Delivering **greater stability**, a **smoother ride**, more **precise handling** and **increased ground clearance without increased ride height**, it makes towing easier and safer than ever before.

Its features include:

AL-KO STUB AXLES, bearings and brakes that are suitable for fitment of AL-KO Electronic Stability Control

- 1 **ELECTROCOATED** surfaces for optimum protection against corrosion and stone chips
- 2 Large diameter, heavy-duty **PEDDERS OFF-ROAD SHOCK ABSORBERS AND COIL SPRINGS** designed specifically for Jayco RVs and Australian conditions
- 3 **AEON RUBBER SPRINGS** inside each coil spring, producing a progressing rate when the suspension is compressed
- 4 **LOW MAINTENANCE** pivots with grease points
- 5 **TOE-IN AND TOE-OUT** adjustment for wheel alignment
